

TC-ECF13230-M  
EC FAN CONTROLLER  
MANUAL

DATASHEET-  
OPERATIONAL GUIDE.

En-GB  
METRIC.  
M Series

TRANSMONK  
simply precise.

The controller is designed/programmed to control EC-fan speed, actuators, or any other applications with an analog (0—10 VDC / 0—20 mA / PWM) signal. It is developed to control equipment that needs a stepless control signal. The supply voltage for this controller is 230 V AC. The output voltage is adjusted from 0 to 10 by manual feed buttons. It is also equipped to take feedback from fan, actuators and display it on screen. Any change in feedback can be directly shown with display screen.

### Key feature

- 1.3-inch OLED Screen with fan parameter display
- Variable stepless speed can be achieved
- Insert Mounting
- User-friendly 3 button interface

### Additional feature on demand

- Remote (RF) based control (Model number selection TC-ECF13230-M/RF)
- Modbus RTU (RS485) communication for integration with BMS (Model number selection TC-ECF13230-M/RS)

### Technical parameters

- Supply input: 230V AC
- Variable output :0-10V
- Indoor use only
- Tech input for EC fan RPM
- Temp range 0-60 degree C

### Display parameters

- RPM
- Flow % in case of fan
- Controlling volt

## Wiring Connection

Pin 1- NA	Pin 6- NA
Pin 2-A(Modbus +)	Pin 7- 0 to 10V (variable output to fan/actuator)
Pin 3-B(Modbus -)	Pin 8-tach input from fan
Pin 4-N (230V Neutral, Mains)	Pin 9- NA
Pin 5-L (230V Line, Mains)	Pin 10- Ground (for fan)

## Dimensional details

## Operating Instructions

### Keys

On/off Button

Increase value (up keys)

Decrease value (down keys)

### Display

Fan RPM

Flow %

Controlling Volt

## Operating Instructions

- Use up  and down  keys to increase and decrease fan RPM, a beep sound will occur while changing values.
- Use  button to switch on/off

### Use of remote (For Model: TC-ECF13230-M/RF)

- Use up  and down  keys to increase and decrease fan RPM
- Use  button to switch on/off

### Set Maximum and minimum voltage

Step 1: Press up  and  keys together for 2 sec till a beep occurs , continuous beep sound indicate that we are in setting mode.

Step 2: Use power key  to toggle between Minimum voltage (Display Min Volt) and Maximum voltage (Max Volt)

Step 3: To set minimum voltage, check at display shows “Min Volt” then use up  and  down keys to change the value and set as per your requirement.

Step 4: To set maximum voltage, check at display shows “Max Volt” then use up  and  down keys to change the value and set as per your requirement

## Holding Register (For Model: TC-ECF13230-M/RS)

4001	Module ON/OFF(0/1)	Changeable
4002	RPM	Not
4003	Voltage (0-10)	Changeable
4004	Fan running %	N.A
4005	Min Volt set value	N.A
4006	Max Volt ser Value	N.A
